

June Is:

ATmo

Alternative Transportation Month

OUR GOAL: REDUCE CARBON EMISSIONS BY 2 TONS

The month of June is RB+B's very own ATmo! We're joining fellow officemates in an office-wide challenge to reduce carbon emissions and reach our SMS goal to reduce transportation emissions by 10% in 2011! The goal for ATmo is to reduce our commuting carbon emissions by 2 tons in the month of June.

RB+B will match every ton of carbon saved by purchasing carbon offsets. We have the potential to offset 8 tons of carbon emissions by biking or walking to work in the month of June! Also, carpooling, and riding the bus will help toward the final goal of reducing our carbon emissions by 2 tons! In order to meet the goal, that's **only 8 days per person!**

Have a meeting to go to?

- Borrow David or Ken's vehicle – See Jayne for availability!
- Ride the electric bike!

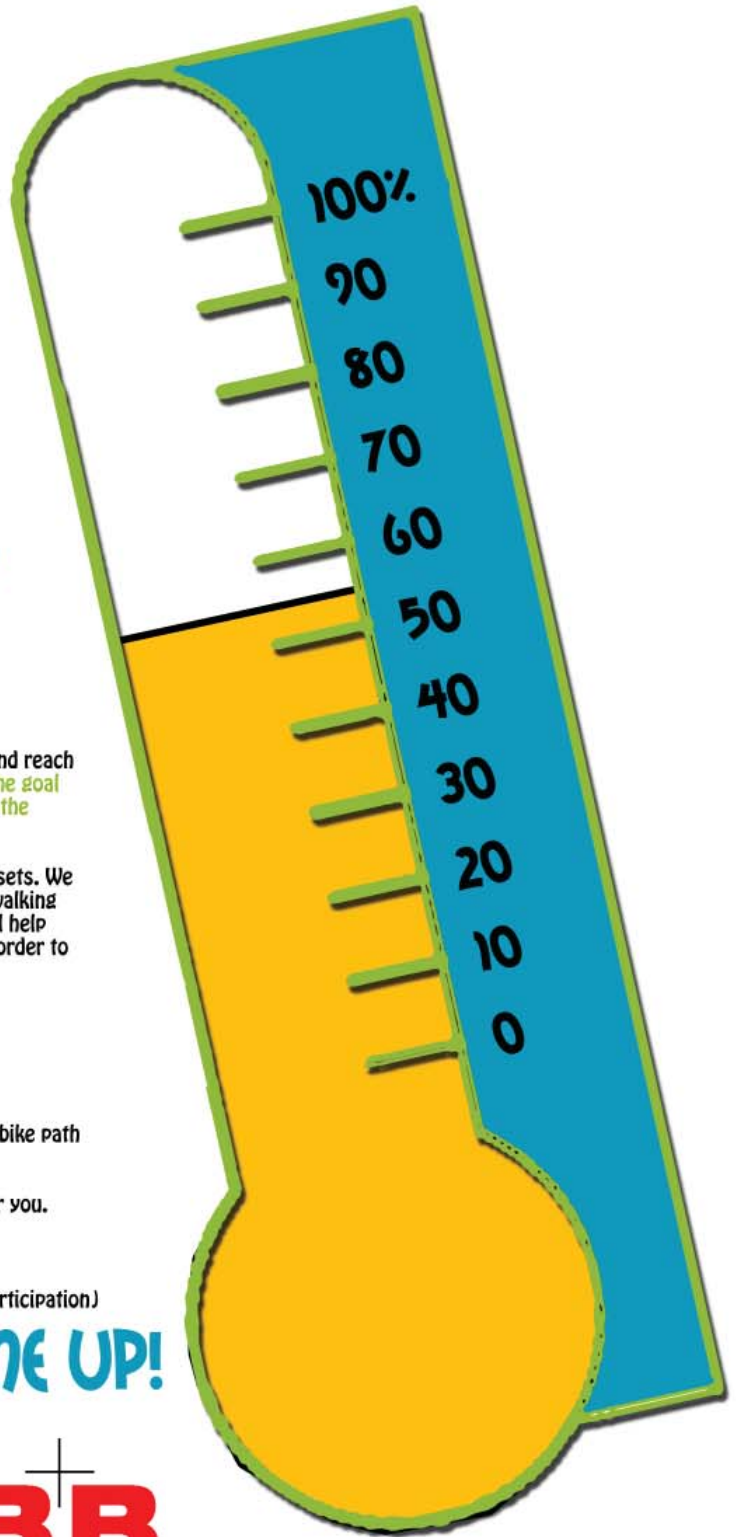

Live too far to bike or walk?

- Drive to a spot in town and bike the rest of the way! (Park near the bike path for a more pleasant commute.)
- Ride the bus!
- Carpool! Check out the map in the copier room to see who lives near you.

GRAND PRIZE! (for the most days of participation)

ALL-INCLUSIVE BIKE TUNE UP!

G:REENteam **RB+B**
Goal: Raising Environmental & Energy Neutrality

Staff bicycling, walking and carpooling to work.
